NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

General Information

1 / BASIS OF PREPARATION

TÜV SÜD is a global technical services provider operating in the INDUSTRY, MOBILITY and CERTIFICATION Segments. The range of services covers testing, inspection, certification and training. TÜV SÜD has a presence in the regions EUROPE, AMERICAS and ASIA.

TÜV SÜD Aktiengesellschaft, with registered offices in Munich, Germany, is entered in the commercial register of Munich District Court under the number HRB 109326, as the parent company of the Group.

TÜV SÜD AG prepared its consolidated financial statements as of 31 December, 2020 in accordance with the International Financial Reporting Standards (IFRSs) by exercising the option under Section 315e (3) HGB ["Handelsgesetzbuch": German Commercial Code]. All IFRSs that are binding for the fiscal year 2020 and the pronouncements issued by the International Financial Reporting Standards Interpretations Committee (IFRS IC) have been applied to the extent that these have been adopted by the European Union.

On March 12, 2021, TÜV SÜD AG's Board of Management approved the consolidated financial statements for the fiscal year 2020 for submission to the Supervisory Board.

2 / SCOPE AND PRINCIPLES OF CONSOLIDATION

All material entities and structured entities over which the Group has control as defined by IFRS 10 are included in the consolidated financial statements as of December 31, 2020. The separate financial statements of the subsidiaries included in consolidation and prepared in accordance with uniform accounting policies serve as a basis.

Associated companies and joint ventures are accounted for in the consolidated financial statements using the equity method. The shares are capitalized at acquisition cost at the time a significant influence is acquired and in subsequent years are increased or reduced by the proportionate net income, distributed dividends and other changes in equity.

Joint operations are consolidated proportionately with their assets and liabilities as well as expenses and income.

With TÜV SÜD AG as parent company, the scope of consolidation comprises the number of entities shown in the table below. ≡ 18

TÜV SÜD AG ANNUAL REPORT 2020

CONSOLIDATED FINANCIAL STATEMENTS

1O4 Consolidated income statement 1O5 Consolidated statement of comprehensive income 106 Consolidated statement of financial position 107 Consolidated statement of cash flows

59	Independent auditor's report	

	≡18
Dec. 31, 2020	Dec. 31, 2019
105	102
6	7
5	6
1	1
111	109
	105 6 5 1

The scope of consolidation was extended in fiscal year 2020 to include four new entities. The additions relate to two first-time consolidations after acquiring additional shares, a first-time consolidation of an existing group company and the first-time consolidation of a company previously accounted for using the equity method. One company was no longer included in the scope of consolidation. This deconsolidation led to a gain of €0.1 million (prior year: gains of €4.5 million and losses of \notin 0.6 million), which is recognized in other income.

The affiliated companies, associated companies and joint ventures included in the consolidated financial statements are listed in note 39 "Consolidated entities" along with the consolidation method applied. The list of the Group's entire shareholdings is published in the German Electronic Federal Gazette (Elektronischer Bundesanzeiger) as an integral part of the notes to the financial statements.

Consolidation decisions based on contractual arrangements

The TÜV SÜD Group holds 50% of the shares in TÜV SÜD Car Registration & Services GmbH (CRS), Munich. The entity is fully consolidated in the Group, as the TÜV SÜD Group is responsible for economic control of the entity on the basis of the contractual arrangements and can thus make decisions regarding the relevant activities of the entity.

Risks from structured entities

In its capacity as a limited partner of the structured entities ARMAT GmbH & Co. KG, Pullach, and ARMAT Südwest GmbH & Co. KG, Pullach, TÜV SÜD AG has issued liquidity commitments for the aforementioned entities. These commitments serve to cover the current obligations of the structured entities. Claims may therefore be lodged against TÜV SÜD AG if the entities are unable to settle their obligations themselves. The risk of such a claim is considered low.

There are risks typical of ownership resulting from the special fund MI-Fonds F60. No liquidity commitments or guarantees were issued in this connection.

3 / BUSINESS COMBINATIONS

The acquisition of subsidiaries and businesses is accounted for using the acquisition method. For highly complex business combinations, external appraisers are obtained to carry out the purchase price allocation and to determine the fair values.

Transactions in 2020

In fiscal year 2020, TÜV SÜD acquired additional shares in three companies, gaining control of two of them in the process. TÜV SÜD has already had control of the third company since the beginning of the year on account of amended provisions in the articles of association. Considered individually the acquisitions were not significant. Based on the figures as of the respective acquisition dates, the aggregate effect on the consolidated financial statements was as follows:

≡ 19

Net assets acquired, goodwill and purchase prices of business combinations in fiscal year 2020

IN & MILLION	Carrying amount before revaluation	Fair value at first-time consolidation
Intangible assets, right-of-use assets and property, plant and equipment	6.6	14.0
Other assets (excluding cash and cash equivalents)	9.7	9.7
Cash and cash equivalents	7.2	7.2
Current liabilities	7.5	7.5
Non-current liabilities	7.8	7.5
Total net assets acquired	8.2	15.9
Net assets acquired attributable to TÜV SÜD		10.4
Goodwill arising on acquisition		16.1
Purchase prices of business combinations (cash consideration)		26.5
Less: value adjustments from the remeasurement of existing shares		-1.7
Plus: contributions to earnings and changes in value recognized prior to the first-time consolidation		7.4
Less: cash and cash equivalents acquired		-7.2
Less: purchase price payments made in prior years		-25.4
Net cash inflow from business combinations in 2020		-0.4

Hidden reserves totaling \notin 7.4 million were identified in development projects and other intangible assets with a useful life of ten to twelve years.

The goodwill from these acquisitions contains value drivers that cannot be separately quantified, in particular the value of the acquired workforce, future growth potential taking into account advanced and new technology as well as expected synergy effects.

No significant acquisition-related costs were recognized in the income statement in 2020 for the business combinations outlined above.

In the past fiscal year, the entities made a contribution to TÜV SÜD's revenue of \notin 3.4 million and \notin –2.6 million to the operating result. The operating result does not contain any

synergies created for existing legal entities in the TÜV SÜD Group as a consequence of the business combinations. Had the entities been acquired as of January 1, 2020, the acquired entities would have made a contribution to consolidated revenue of € 5.8 million and a contribution of $\in -1.8$ million to the operating result for the twelve months ended December 31, 2020.

Transactions in 2019

On December 31, 2019 TÜV SÜD AG acquired all of the shares in TÜV SÜD Pensionsgesellschaft mbH (formerly TÜV SÜD Föderation GmbH), Munich, from TÜV SÜD e.V., Munich. As the company's sole purpose is to manage pension obligations, the transaction does not constitute an acquisition of a business within the meaning of IFRS 3. The company has been fully consolidated since the date of acquisition. The difference resulting from this transaction of \notin 3.8 million was recognized as an increase in capital reserves. 4 / CURRENCY TRANSLATION

All financial statements of consolidated entities that have been prepared in foreign currency are translated into euro using the functional currency concept. As the foreign subsidiaries are independently operating entities, the functional currency is considered to be the currency of the respective country in which they are situated. Items of the statement of financial position are therefore translated using the mean rate on the reporting date. This does not include equity, which is translated using historical rates. Expense and income items are stated using annual average exchange rates. Exchange rate differences are treated as other comprehensive income and recognized in other reserves within equity.

In the subsidiaries' separate financial statements, monetary items in foreign currency are translated using the closing rate as of the reporting date, while non-monetary items continue to be measured using the historical exchange rate as of the date of the transaction. Differences resulting from such translations are generally recognized in the income statement.

The exchange rates used to translate the most important currencies developed as follows:

Selected exchange rates

	Closing rate		Annual average rate	
	Dec. 31, 2020	Dec. 31, 2019	2020	2019
Chinese renminbi (CNY)	8.0225	7.8205	7.8708	7.7339
Pound sterling (GBP)	0.8990	0.8508	0.8892	0.8773
Singapore dollar (SGD)	1.6218	1.5111	1.5736	1.5272
Turkish lira (TRY)	9.1131	6.6843	8.0436	6.3574
US dollar (USD)	1.2271	1.1234	1.1413	1.1196

5 / ACCOUNTING POLICIES

The key accounting and measurement methods for TÜV SÜD are presented below; the mere repetition of standard requirements has been largely avoided. The exercise of options is explained in the respective specific note.

Revenue is recognized pursuant to IFRS 15 "Revenue from Contracts with Customers" and mainly consists of income from service business with customers. The values agreed in contracts or defined in price lists form the basis for calculating the revenue to be recognized. Revenue from long-term contracts is recognized over time pursuant to IFRS 15.35c, which involves recognizing costs and revenue in line with the degree to which the contract has been completed. The percentage of completion per contract to be recognized is calculated as the ratio of the actual costs incurred to overall anticipated costs of the project (cost-to-completion method). This is the most suitable method for TÜV SÜD to measure progress. Contract costs are expensed in the period in which they are incurred. When it is foreseeable that total contract costs will exceed total contract revenue, the expected loss is immediately expensed. Contracts are generally processed within one year. As a practical expedient, the company opts not to measure financing components pursuant to IFRS 15.63. The revenue recognition, settlement and cash inflows result in trade receivables, contract assets as well as contract liabilities. With respect to the type of the contract, a distinction is made between service contracts, usually training and advisory services, and contracts for work and labor, such as certification or testing services. The timing of revenue recognition and billing can be derived from the type of contract. The majority of service contracts are billed monthly, contracts for work and labor upon reaching individually agreed milestones or upon completion. The average group-wide payment terms range between 30 and 60 days, taking country-specific requirements such as statutory defined payment terms into account.

Goodwill is not subject to amortization but is tested for impairment at least once a year or whenever there is any indication of impairment, and written down if appropriate (impairment only approach). This impairment test is based on cash generating units (CGUs) and compares the recoverable amount with the carrying amount. The cash generating units correspond to the Group's divisions, which are managed on a worldwide basis.

CONSOLIDATED FINANCIAL STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

The recoverable amount is the higher of fair value less costs to sell and value in use derived from the plan for 2021 prepared and approved by management, with the aid of the discounted cash flow method. The key assumptions made in determining fair value are the growth rates of the cash flows in the planning period, the CGU-specific cost of capital and the forecast sustainable growth rate after the end of the planning period. The planned cash flows are based mainly on estimates by the management of TÜV SÜD of the current and future market environment. Cost of capital is based on the weighted average cost of capital (WACC) of the TÜV SÜD Group adjusted for the specific risk profile inherent in the cash flows budgeted for the cash generating unit in question. The sustainable growth rate used is the forecast long-term rate of the cash generating unit's market growth.

Other intangible assets acquired for a consideration are measured at acquisition cost, **internally generated intangible assets** at production cost. Production cost comprises the costs directly and indirectly allocable to the development process.

Pursuant to IFRS 16, from January 1, 2019 **leases** are recognized, at the time at which the lease asset is made available to the Group, at the lessee as a right-of-use asset and a corresponding lease liability. **Right-of-use assets** are measured at cost comprising the initial amount of the lease liability adjusted for lease payments made on or before the commencement date along with initial direct costs and estimated costs for possible restoration obligations. The right-of-use asset is depreciated on a straight-line basis over the shorter of the useful life of the right-of-use asset and the lease term.

At the time of initial recognition, **lease liabilities** are measured at the present value of the lease payments not yet paid at the commencement date of the lease. These are discounted using the incremental borrowing rate of the respective lessee as the interest rate implicit in the lease cannot be readily determined. Currency-specific reference interest rates for various periods of up to 50 years from risk-free interest rates with matching terms are used to determine the incremental borrowing rate. The latter is increased by loan risk premiums and adjusted for the duration of an agreement. The lease liability mostly accounts for fixed lease payments and variable lease payments linked to an index or interest rate. When determining the term of leases TÜV SÜD takes account of all those facts and circumstances that offer an economic incentive to exercise options to extend the lease or not exercise options to terminate it. Changes to the term stemming from options to extend or terminate the lease being exercised are only included in the term of the agreement if it is reasonably certain that an option to extend a lease or not terminate it will be exercised. The lease liability is remeasured if future lease payments change on account of a change in an index or if the Group amends its estimation regarding whether the option to extend or terminate the lease will be exercised. The right-of-use asset is adjusted accordingly.

Practical expedients are applied for leases of low-value assets and short-term leases. In these cases, the lease payments are expensed on a straight-line basis in the income statement. Lease agreements with a term of up to twelve months qualify as short-term leases. Low-value assets include IT equipment and smaller technical devices, for example. Furthermore, the requirements of IFRS 16 on lease accounting are not applied to leases for intangible assets. Intragroup leases are likewise not recognized pursuant to IFRS 16. This means that in the segment reporting pursuant to IFRS 8, lease payments for these leases are also recognized in profit or loss on a straight-line basis over the term of the lease.

Lease payments are divided up into payments of principal and interest. The interest component is recognized under cash flow from operating activities in the statement of cash flows, whereas payments made to repay the lease liabilities are shown under cash flow from financing activities.

At each reporting date, the Group assesses whether there is any indication that the carrying amounts of intangible assets, rightof-use assets, property, plant and equipment and investment property may be subject to **impairment**. If any such indication exists, an impairment test is performed. For intangible assets with an indefinite useful life, such a test is conducted annually.

Current income taxes are calculated based on the respective local taxable income and local tax rules in place for the year. Furthermore, current taxes recognized in the fiscal year include adjustments for uncertain tax payments or refunds for years that have not yet been finally assessed. However, these exclude interest payments or interest refunds and penalty payments on the payment of tax arrears. Corresponding provisions are recognized in the event that the amounts stated in the tax returns are not likely to be recognized (uncertain tax positions). The amount is determined from the best estimate of the expected tax payment (expected value or most likely amount of the tax uncertainty). Tax refund claims from uncertain tax TÜV SÜD AG Annual Report 2020

Provisions for pensions and similar obligations are measured

using the actuarial projected unit credit method for defined

benefit pension plans. The amount shown on the statement of

financial position represents the current value of the pension obligation after offsetting the fair value of plan assets as of the reporting date. The calculation of pension obligations is based on actuarial reports considering biometric assumptions.
FRS Remeasurements, comprising actuarial gains and losses and the return on plan assets (excluding interest on the net liability), are recognized in full in the fiscal year in which they occur. They are charged directly against revenue reserves, taking deferred taxes into account, and reported outside of the income statement as a component of other comprehensive income. The net interest expense is obtained by multiplying the discount rate for the respective fiscal year by the net liability (pension obligation less plan assets) as of the reporting date for the prior fiscal year. It is reported in the financial result.
Other provisions are recorded if the obligation to a third party.

Other provisions are recorded if the obligation to a third party results from a past event which is expected to lead to an outflow of economic benefits and their value can be determined reliably. They are measured using the best estimate of the settlement value, and cannot be offset against reimbursement claims. Provisions due in more than one year are discounted where the effect of the time value of money is material. The effect from unwinding the discount is reported in the financial result. Provisions for restructuring measures are recognized to the extent that a detailed formal restructuring plan has been prepared and communicated to the parties concerned.

A **financial instrument** is a contract that gives rise to both a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets and liabilities are initially recognized on the trade date at their fair value taking into account any transaction costs. Subsequent measurement depends on the category to which they are allocated.

positions are recognized if it is more likely than not and thus reasonably certain that they can be realized. Only in the case of tax loss carryforwards is no tax liability or tax claim recognized for these uncertain tax positions. Instead, the deferred tax assets for the unused tax loss carryforwards are to be adjusted.

Deferred tax assets and liabilities are recognized for temporary differences between the carrying amounts in the IFRS statement of financial position and the tax basis of the assets and liabilities, as well as for consolidation measures with an effect on income. In addition, taxes are deferred for tax loss carryforwards provided the realization of such carryforwards is sufficiently certain. The taxable income considered likely on the basis of the respective entity's planning for the subsequent three years is taken as the basis for the assessment. Deferred taxes are calculated on the basis of the anticipated tax rates at the time of realization. For convenience, TÜV SÜD AG's tax rate is used to calculate deferred taxes and liabilities on temporary differences are netted out for each entity and/or tax group.

Contract assets are accounted for using the cost-to-completion method in accordance with IFRS 15. These receivables are normally current and are expected to result in external revenue in the following year. Anticipated losses from these contracts are taken into account on the liabilities side if they can be reliably estimated. Project-related advance payments received from customer contracts are deducted from contract assets.

Advance payments not covered by services already rendered are recognized under **contract liabilities**. Contract liabilities are normally current and are expected to result in external revenue in the following year.

Non-current assets and disposal groups held for sale relate to assets that can be sold in their present condition and whose sale is highly probable. Management has committed to a plan to sell the assets and the sale is expected to be completed within one year from the date of the classification. Liabilities to be sold together with assets in a single transaction are part of a disposal group or discontinued operations and are reported separately as **liabilities directly associated with non-current assets and disposal groups held for sale**. Non-current assets held for sale are no longer amortized or depreciated. Instead they are stated at their fair value less costs to sell from the date of classification provided that this is lower than the carrying amount.

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

Under IFRS 9 "Financial Instruments", financial assets are classified into measurement categories based on the business model for managing these financial instruments and on the type of their underlying contractual cash flows. A distinction is made between the following **measurement categories**:

- Debt instruments at amortized cost.
- Debt instruments at fair value through other comprehensive income: accumulated gains and losses will be reclassified to the income statement upon derecognition of the debt instruments.
- Debt instruments, derivatives and equity instruments at fair value through profit or loss.
- Equity instruments at fair value through other comprehensive income: gains and losses remain in other comprehensive income even after derecognition of these financial instruments.

The business models were determined by the Board of Management using data, facts and circumstances as of the date of firsttime application. The contractual cash flows were checked on the basis of the conditions when the respective assets were recognized for the first time. In the TÜV SÜD Group, the two business models "hold to collect" and "hold to collect and sell" were defined. No debt instruments were designated as at fair value through profit or loss. Debt instruments are thus measured at amortized cost or at fair value through other comprehensive income.

The **equity instruments** held by the TÜV SÜD Group primarily relate to non-consolidated shares in affiliated companies and participations. These are allocated to the "at fair value through other comprehensive income" measurement category. Due to immateriality, they are measured at amortized cost, as this roughly corresponds to their fair values. The TÜV SÜD Group's participations are not listed. The general approach for recording impairment losses is used on all debt instruments, apart from trade receivables. With this method risk provisioning for expected credit losses is recorded in two stages. Debt instruments where the credit risk has not increased significantly since first-time recognition are covered by a risk provision in the equivalent to the credit losses expected to be incurred within the next twelve months. Debt instruments where the credit risk has increased significantly since first-time recognition have to be accounted for with a risk provision equivalent to the credit losses expected to be incurred over the residual term. The TÜV SÜD Group uses external ratings to monitor changing credit risks. A significant change in the credit risk is defined as when the external rating is no longer in the investment grade range, or also when the contractually agreed payments are more than 30 days overdue. If the contractually agreed payments are more than 90 days overdue, this is classed as a default.

The simplified approach is applied to trade receivables. At each reporting date, a risk provision equivalent to the credit losses expected to be incurred over the entire term is recognized. A provision matrix is used to measure loss allowances in the TÜV SÜD Group. The expected loss rates are calculated using the roll-rate method, which is based on the probability of a receivable progressing to payment delay in successive stages. Roll rates are calculated separately for the defaults of each entity in the TÜV SÜD Group. Forward-looking information about expected changes in country ratings is used to supplement the internal historical expected loss rates.

The TÜV SÜD Group has not made use of the option under IFRS 9 to recognize hedges. Derivatives are held to account for economic hedging relationships and are therefore measured at fair value.

Financial liabilities are recognized at either amortized cost or fair value pursuant to IFRS 9. In the TÜV SÜD Group, derivatives, liabilities from put options as well as contingent considerations from business combinations as defined by IFRS 3 are carried at fair value. All other liabilities are recognized at amortized cost. TÜV SÜD AG Annual Report 2020

159 Independent auditor's report

Government grants are recognized in the statement of financial position if there is reasonable assurance that the grant will be received and the conditions attached to the grant have been or are deemed to be fulfillable. In the TÜV SÜD Group, this is assumed to be the case if the minimum likelihood of receiving the grant stands at least at 80%. The gross method is applied in the TÜV SÜD Group for the recognized as deferred income in the statement of financial position and as other income in profit or loss. Grants related to assets are recognized over the economic useful life of the respective asset while grants related to income are recognized on the basis of the subsidized expenses incurred in the fiscal year.

Assumptions, estimation uncertainties and judgments

The preparation of the consolidated financial statements requires that assumptions or estimates are made for some items which have an effect on the values stated in the statement of financial position, the disclosure of contingent liabilities and the recognition of income and expenses. This particularly relates to revenue recognition using the cost-to-completion method, goodwill, deferred tax assets recognized on tax loss carryforwards, the measurement parameters for pension obligations and other provisions, and the calculation of fair values. Actual amounts may differ from these estimates.

Key estimate parameters as part of **testing goodwill for impairment** include the sustainable long-term growth rates as well as the cash flows allocable to cash generating units and the risk adjustment per cash generating unit of the TÜV SÜD Group's weighted average cost of capital. A 10% decrease in cash flow, which is used to calculate the fair value less costs to sell or the value in use of the cash-generating unit, would not lead to an impairment loss on goodwill that is not impaired. The same applies for an increase of one percentage point in the weighted average cost of capital or a decline of one percentage point in the sustainable growth rate.

The **defined benefit obligations (DBO)** and the pension expenses for the subsequent year are calculated using the actuarial parameters specified in note 22. However, a change in parameters would not have an impact on the consolidated net income for the reporting year, as remeasurements are recognized in equity with no effect on income. The recognition and measurement of provisions and contingent liabilities in connection with pending and imminent legal proceedings are based to a significant extent on estimations made by TÜV SÜD. Assumptions must be made regarding their probability of occurrence, maturity and level of risk, which are subject to significant estimation uncertainty. This applies, in particular, to the estimation regarding the probability of utilization, the level of the potential liability risks and the amount of the legal and advisory costs associated with the dam collapse in Brazil depending on how long legal proceedings carry on. TÜV SÜD evaluates the matters using internal and external experts based on the circumstances prevailing as of the reporting date and knowledge gained prior to the preparation of the financial statements. Note 30 presents the Group's pending and imminent legal proceedings, the outcome of which could have a significant impact on the Group's financial performance and position for fiscal year 2021 and future fiscal years.

In the case of other items of the statement of financial position, a change to the original basis for estimation results in a change to the respective item, with an effect on income, which is immaterial for the consolidated financial statements.

Accounting standards applied for the first time in the current fiscal year

The Group has early adopted the amendment to the standard "COVID-19-Related Rent Concessions – Amendments to IFRS 16", which was published on May 28, 2020. The amendment includes a voluntary practical expedient for leases, for which TÜV SÜD is the lessee and for which qualifying rent concessions have been granted, which are a direct consequence of the COVID-19 pandemic. In these instances TÜV SÜD does not have to review whether the rent concessions represent a modification of the lease, but rather should recognize them as if they did not represent a modification of the rent agreement.

Other amendments to standards, which had to be applied for the first time as of January 1, 2020, did not have any material impact on the consolidated financial statements.

New accounting standards that are not yet mandatory

The following amendments of standards generally relevant for TÜV SÜD were issued by the IASB and adopted by the EU prior to the preparation of TÜV SÜD's consolidated financial statements, but have not yet been applied in the consolidated financial statements as of December 31, 2020. The amendments are mandatory for the first time for fiscal years beginning on or after their respective effective dates. TÜV SÜD decided not to early adopt such standards on a voluntary basis.

New accounting standards endorsed by the EU that are not yet mandatory

Standard	Effective date pursuant to EU endorsement	Anticipated impact on TÜV SÜD AG's consolidated financial statements
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform – Phase 2"	January 1, 2021	No significant consequences are expected for the consolidated financial statements.

The table below shows those standards and amendments to existing standards issued by the IASB which could be relevant for TÜV SÜD, but which have not yet been adopted by the EU and which are therefore not yet applicable for IFRS financial statements prepared pursuant to Section 315e HGB.

New accounting standards not yet endorsed by the EU that are not yet mandatory

Notes to the consolidated income statement

6 / PERSONNEL EXPENSES

Personnel expenses		≡ 23
IN € MILLION	2020	2019
Wages and salaries	1,237.1	1,264.3
Social security contributions and other benefit costs	165.1	171.9
Retirement benefit costs	115.8	107.8
Incidental personnel costs	24.9	28.9
	1,542.9	1,572.9

The decline in wages and salaries including social security contributions and other benefit costs results in addition to deconsolidation effects from government subsidized shorttime work in Germany, primarily in the Academy business, and lower social security costs in China, where the social security rates were reduced on account of the pandemic.

Retirement benefit costs also include employer contributions to state pensions. The current service cost increased by \notin 3.6 million in fiscal year 2020. In this context, the effect of the reduced discount rate of 1.7% applied in Germany for pension expenses in 2019 to 0.95% for pension expenses in 2020 exceeded the effect of the decrease in the number of active employees. Other factors included higher employer contributions to state pensions in Germany and the raised contribution rate payable to the pension protection scheme (Pensions-Sicherungs-Verein).

The TÜV SÜD Group had an average headcount (full-time equivalents) of 22,803 employees in the reporting year (prior year: 23,024 employees). The majority of employees are salaried employees.

11 / INCOME TAXES

Income taxes				≡ 28
IN € MILLION	202	0	201	9
Current taxes		67.8		32.9
Deferred taxes				
on temporary differences	-24.9		21.4	
on tax loss carryforwards	4.3	-20.6	-2.5	18.9
		47.2		51.8

Current taxes for the fiscal year 2020 include expenses of $\notin 0.1$ million (prior year: $\notin 2.0$ million) for current taxes from prior periods.

The following reconciliation for the TÜV SÜD Group presents a summary of the individual entity-specific reconciliations prepared using the respective local tax rates taking consolidation entries into account. The expected income tax expense is based on the nominal tax rate of the tax group of TÜV SÜD AG:

Tax reconciliation		≡29
IN € MILLION	2020	2019
Income before taxes	158.2	184.4
Expected tax rate	30.6%	30.6%
Expected income tax expense	48.4	56.4
Tax rate differences	-3.4	-3.9
Tax reductions due to tax-free income	-9.2	-9.1
Tax increases due to non-deductible expenses	5.6	6.1
Tax increases due to income taxes and withholding taxes neither creditable nor deductible	3.5	4.7
Tax effect on accounting for associated companies and joint ventures using the equity method	-3.0	-4.8
Tax increases on account of non-deductible impairment of goodwill	2.8	0.0
Current and deferred taxes for prior years	-0.4	1.9
Tax credits, valuation allowances and adjustments to carrying amounts of deferred taxes	3.5	2.2
Effect of changes in tax rates	0.3	-0.7
Other differences	-0.9	-1.0
Reported income tax expense	47.2	51.8
Effective tax rate	29.8%	28.1%

Tax credits, valuation allowances and adjustments to carrying amounts of deferred taxes contain deferred tax income of $\notin 0.2$ million (prior year: $\notin 0.6$ million) from the decrease in the deferred tax expense caused by previously unrecognized tax loss carry-forwards. This was counterbalanced by deferred tax expenses of $\notin 3.7$ million (prior year: $\notin 3.4$ million) from

the change in valuation allowances recognized on deferred taxes on tax loss carryforwards and temporary differences. The current tax expense was reduced by $\notin 0.1$ million (prior year: $\notin 0.4$ million) on account of previously unrecognized tax loss carryforwards.

Deferred taxes on temporary differences	316.6	277.8	17.4	22.5	
Deferred taxes on tax loss carryforwards	2.7	6.5			
	319.3	284.3	17.4	22.5	

In Germany, no deferred taxes were recognized on corporate income tax loss carryforwards of \in 35.0 million (prior year: \in 13.6 million) and trade tax loss carryforwards of \in 32.5 million (prior year: \in 13.3 million), because it is not likely at present that the tax benefits will be realized. These tax loss carryforwards can be carried forward for an indefinite period. Outside of Germany, no deferred taxes were recognized on tax loss carryforwards of \in 31.8 million (prior year: \in 30.9 million). Of these tax loss carryforwards, \in 29.1 million (prior year: \in 28.1 million) can be used indefinitely and \in 2.7 million (prior year: \in 2.8 million) will expire within the next five years. Furthermore, no deferred tax assets were recognized for

deductible temporary differences of \notin 3.9 million (prior year: \notin 6.5 million) and for capital losses in the USA in the amount of \notin 7.6 million (prior year: \notin 8.6 million).

Differences on investments in subsidiaries totaling \in 17.7 million (prior year: \in 18.4 million) did not give rise to deferred tax liabilities because the differences are not expected to reverse in the foreseeable future by way of realization (distribution or sale of the entity).

The net balance of deferred tax assets and deferred tax liabilities changed as follows in the reporting year:

Development of the net balance of deferred tax assets and deferred tax liabilities

The carrying amounts of goodwill are principally allocated to the following groups of cash generating units (CGUs):

Goodwill

IN € MILLION	Dec. 31, 2020	Dec. 31, 2019
Industry Service	82.8	88.4
Real Estate & Infrastructure	23.6	34.9
Auto Service	34.0	34.9
Product Service	32.8	34.9
Other	17.2	4.8
	190.4	197.9

Intangible assets acquired for a consideration primarily contain software and accreditations as well as values identified in the course of purchase price allocations, such as customer relationships, trademark rights, software and concessions.

Internally generated intangible assets essentially comprise software and development costs.

Intangible assets with finite useful lives are amortized using the straight-line method over a period of two to 20 years.

The item "licenses and similar rights and customer relationships" includes expenses amounting to $\notin 2.2$ million (prior year: $\notin 3.4$ million) for the license of TÜV SÜD Bursa, Kestel-Bursa, Turkey for regular vehicle inspections. The operator's license is amortized over its term until August 2027 using the straight-line method.

As of the reporting date, the carrying amount of concessions, accreditations and trademark rights with indefinite useful lives comes to \notin 24.9 million (prior year: \notin 29.7 million), of which \notin 16.2 million (prior year: \notin 20.3 million) relates to the Auto Service CGU and \notin 8.7 million (prior year: \notin 9.4 million) to the Industry Service CGU.

Impairment losses of \notin 5.2 million (prior year: \notin 1.7 million) were recognized on customer-related assets and concessions and licenses as part of the annual impairment test of intangible assets. Of these amounts, \notin 1.1 million (prior year: \notin 1.6 million) is attributable to the INDUSTRY Segment, \notin 4.1 million (prior year: \notin 0.0 million) to the MOBILITY Segment and \notin 0.0 million (prior year: \notin 0.1 million) to the CERTIFICATION Segment.

Impairment losses of \notin 15.6 million (prior year: \notin 0.0 million) were recognized on goodwill, which mainly resulted from the strategic realignment of a business in the INDUSTRY Segment.

The calculation of fair value less costs to sell per CGU was based on a discount rate of between 6.5% and 7.6% taking income taxes into account (prior year: between 6.4% and 7.2%). As in the prior year, the sustainable growth rate remained unchanged at 1.0% for all CGUs. The calculation of the fair values for the CGUs falls under level 3 of the fair value hierarchy.

Research and development expenses of approximately \notin 16 million (prior year: approximately \notin 20 million) were recognized through profit or loss in the reporting year.

Depreciation and impairment losses in the fiscal year 2019	- 15.1	-17.0	- 32.0	-0.1	-64.2

Depreciation of property, plant and equipment is generally charged using the straight-line method. Buildings and parts of buildings are depreciated over a maximum period of 40 years, technical equipment over a period of five to 20 years, and furniture and fixtures over a period of three to 23 years. Impairment losses to the lower fair value of $\in 8.3$ million (prior year: $\in 1.6$ million) were recognized. Of this amount, $\in 1.4$ million (prior year: $\in 0.1$ million) is attributable to land and buildings, $\notin 6.1$ million (prior year: $\in 0.3$ million) to technical equipment and machinery, $\notin 0.8$ million (prior year: $\in 1.1$ million) to other equipment, furniture and fixtures and $\notin 0.0$ million (prior year: $\notin 0.1$ million) to assets under construction.

Accumulated depreciation	-1.9	-1.8
Carrying amount as of December 31	3.0	3.0
Depreciation and impairment losses in the fiscal year	-0.1	-0.1

Investment properties are measured at amortized cost. As of December 31, 2020, they had a market value of \notin 7.9 million (prior year: \notin 7.3 million).

Measurement at fair value of the investment property is classified as level 3 in the fair value hierarchy. If current market data is not available, the fair value is calculated on the basis of a capitalized earnings method pursuant to the ImmoWertV ["Immobilienwertermittlungsverordnung": German Ordinance on the Valuation of Property] and derived from the standard land values as well as the expected rental income. Essential input factors in the valuation that are not directly observable on the market include property yield, which is significantly influenced by property location and type. The property yield used in the valuation was unchanged on the prior year at 2.6%.

Joint ventures

≡ 37

TÜV SÜD holds 33.3% of the shares in each of the two Turkish companies TÜVTURK Güney Tasit Muayene Istasyonlari Yapim ve Isletim A.S. (TÜVTÜRK Güney), Istanbul, and TÜVTURK Kuzey Tasit Muayene Istasyonlari Yapim ve Isletim A.S. (TÜVTÜRK Kuzey), Istanbul. The other venturers of the companies are the Dogus Group, Istanbul, Turkey, and Test A.S., Istanbul, Turkey, a company from the Bridgepoint Group, London, UK, which each also hold one third of the shares. The joint arrangements are structured as separate vehicles. TÜV SÜD has a right to the net assets of the companies. As a result, the joint arrangements are classified as joint ventures and accounted for using the equity method. There are no quoted prices for these companies.

In 2007, the TÜVTÜRK companies concluded a concession agreement with the Turkish government, governing the implementation of regular vehicle inspections throughout Turkey. Using different contractual partners, the joint venture is the exclusive provider of vehicle inspections in Turkey for the 20-year term of the contract. In 2020, 10.3 million (prior year: 9.9 million) vehicle inspections were performed, generating revenue of TRY 3,209.1 million or \notin 399.0 million (prior year: TRY 2,561.7 million or \notin 403.0 million).

Other joint ventures are ITV de Levante, S.A. (ITV Levante), Valencia, Spain, TÜV SÜD DOGUS Ekspertiz ve Danismanlik Hizmetleri Ltd. Sti. (TÜV SÜD DOGUS), Istanbul, Turkey, and FleetCompany GmbH, Oberhaching, which are all accounted for using the equity method. None of these companies has a quoted market price. In the prior year, Uniscon universal identity control GmbH (Uniscon), Munich, which was acquired in July 2017 with a shareholding of 52%, was still recognized in this category. After acquiring further shares in March 2019 and December 2020 in the amount of 24% on each occasion, TÜV SÜD's shareholding now stands at 100%. On account of the contractual arrangements, according to which the right to make decisions on the relevant activities of the company passed over to the TÜV SÜD Group on January 1, 2020, the company has been fully included in the consolidated financial statements since this time. Previously, decisions on relevant activities and processes could only be made with a voting right majority of 80%. This meant that in the prior year the decision-making power could only be exercised jointly by both owners, and the company was thus recognized as a joint venture.

TÜV SÜD has held 50% of the shares in ITV Levante since 2016. The company was founded in 1998 and owns the concessions for three vehicle service stations in the Valencia region, which expire in 2022.

TÜV SÜD DOGUS was founded in 2012 and included in the consolidated financial statements for the first time in the fiscal year 2018. The company offers certification services for second-hand vehicles and other vehicle-related tests as well as consulting and training services in Turkey.

At the end of October 2019, TÜV SÜD sold 60% of the shares in FleetCompany GmbH. TÜV SÜD retained the remaining 40% share. Since the disposal the previously fully consolidated entity has been run as a joint venture.

The following table summarizes the financial information for the joint ventures. The information presented for TÜVTÜRK's reporting year corresponds to the amounts in the preliminary consolidated financial statements, which were prepared in accordance with IFRSs and TÜV SÜD's accounting policies. For the other joint ventures the amounts in the separate financial statements of ITV Levante and TÜV SÜD DOGUS and in the consolidated financial statements of FleetCompany GmbH have been raised to the fair value.

Total		388.2	19.9	

When determining impairment losses as of December 31, 2020, forward-looking information based on the development of gross domestic product and qualitative information were taken into account. This increased loss allowances by \notin 1.8 million. They were allocated in full to the maturity band of 181 to 360 days.

There is no indication that customers might not be able to settle their obligations regarding receivables that are neither impaired nor past due.

19 / OTHER RECEIVABLES AND OTHER ASSETS

Other non-current assets include a receivable of \notin 1.1 million (prior year: \notin 1.5 million), which relates to the funds of the subsidiary TÜV SÜD BRASIL ENGENHARIA E CONSULTORIA LTDA. (TÜV SÜD BRASIL), São Paulo, Brazil, which have been seized by the Brazilian authorities. A corresponding provision was recognized for this amount.

Other receivables and other current assets break down as follows:

Other receivables and other current	≡ 47	
IN € MILLION	Dec. 31, 2020	Dec. 31, 2019

Other current non-financial assets	40.3	30.3
	129.6	101.3

20 / NON-CURRENT ASSETS AND DISPOSAL GROUPS HELD FOR SALE

As part of its portfolio optimization measures, TÜV SÜD initiated the sale of two smaller laboratory service providers in the food sector and the equipment business in the USA in fiscal year 2020, and entered into negotiations with potential buyers.

Of the subsidiaries held for sale in the prior year, the sale of one subsidiary could not yet be completed as of the reporting date as the sale negotiations were delayed due to the pandemic. A corresponding purchase agreement was signed in December 2020, providing for the closing of the sale within the first quarter of 2021. Consequently, this subsidiary continues to be recognized as a disposal group held for sale. In respect of the other subsidiary that was recognized as a disposal group held for sale in the prior year, management decided in 2020 to discontinue this company's business operations. The business relationships of the company were wound up as far as possible and it was deconsolidated in October 2020.

As in the prior year, the measurement of the non-current assets and disposal groups held for sale at fair value less costs to sell did not lead to any impairment losses.

Assets and liabilities allocated to the disposal groups break down as follows:

≡ 48

22 / PROVISIONS FOR PENSIONS AND SIMILAR OBLIGATIONS

restricted for each	riovisions for pensions and similar obligations			
	IN € MILLION	Dec. 31, 2020	Dec. 31, 2019	

Provisions for pensions in Germany	457.9	525.6
Provisions for pensions in other countries	16.6	11.9
Provisions for similar obligations in other countries	11.5	11.3
	486.0	548.8

The Group's post-employment benefits include both defined contribution and defined benefit plans.

Defined contribution plans

In the case of defined contribution plans, the company pays contributions to state or private pension funds on a legal, contractual or voluntary basis. Ongoing premium payments (including contributions to state pension insurance) are stated as pension expenses for the respective year; in the fiscal year 2020, they totaled € 82.4 million (prior year: € 79.3 million). In Germany, all new pension commitments entered into are only defined contribution plans.

Defined benefit plans

Defined benefit plans comprise commitments for retirement, invalidity and surviving dependents' pensions. The Group's obligations vary according to legal, fiscal and economic framework conditions of the country concerned and are usually based on the length of employee service and level of remuneration.

The pension commitments in Germany are integrated schemes similar to those for civil servants, against which the benefits from the state pension are offset. When the statutory pension rises, this relieves the burden on TÜV SÜD. When pension values fall, however, the obligation of TÜV SÜD increases. These integrated schemes were closed for new hires in 1981 and 1992.

The capital reserve mainly includes the premium for various capital increases carried out since 1996.

The capital subscribed of TÜV SÜD AG is divided into

26,000,000 no-par value registered shares with

transferability with an imputed value of € 1.00

Revenue reserves contain the undistributed profits generated in the fiscal year and in the past by the entities included in the consolidated financial statements. Moreover, the revenue reserves record the offsetting of debit and credit differences resulting from capital consolidation for acquisitions prior to December 31, 2005, and the net amount of the adjustments recognized in other comprehensive income in connection with the first-time application of IFRSs as well as new IFRS standards. Furthermore, remeasurements of defined benefit pension plans recognized in other comprehensive income are allocated directly to revenue reserves, taking into account the related deferred taxes. This reflects the fact that these amounts will not be reclassified to the income statement in future periods.

Other reserves record the differences arising from the currency translation of foreign subsidiaries' separate financial statements, effects from the fair value measurement of financial instruments and the income and expenses recognized arising from investments accounted for using the equity method, in each case without effect on income and less the corresponding deferred taxes.

In addition to ensuring the continued existence of the company as a going concern, TÜV SÜD's capital management aims to achieve an adequate return in excess of the cost of capital in order to increase the value of the company in the long term.

21 / EQUITY

registered share.

Furthermore, pension obligations were granted temporarily in Germany in accordance with the "dual pension formula". The amount of the pension benefit is based on the qualifying length of service and the pensionable income; different percentage rates are applied to determine the benefit amount depending on whether the income is above or below the income threshold. These defined benefit plans were likewise closed in 1996.

In addition to this, there are defined benefit plans in Germany from company takeovers that are financed via pension funds in accordance with the demand coverage method.

In Germany, two former employees with company pension claims successfully filed a case against the company pension assessment under the Versorgungsstatut. The adjustment required as a result of the final judgements for all affected members of the company pension plan was implemented in fiscal year 2020. A provision of \notin 11.9 million was recognized for special cases, which could lead to a higher level of benefits. Taking into account the risk provision recognized in fiscal year 2018, overall there was no negative impact on EBIT and equity in the current fiscal year.

There is a defined benefit pension plan in the UK based, among other things, on salary and on length of service. Eligible employees have to pay additional contributions which are agreed between the plan actuary, the trustee and the TÜV SÜD member employer. This pension plan has been closed for new hires.

In other countries there are defined benefit obligations for annuity and termination benefits, based partly on statutory requirements. The resulting obligations are reported under provisions for similar obligations.

Funding the pension plans

In Germany, new pension commitments are financed as defined contribution plans via the pension funds of Allianz and Altersund Hinterbliebenen-Unterstützungskasse der Technischen Überwachungs-Vereine e.V.

In order to secure the pension entitlements from the defined benefit plans, there are legally separate funds in Germany and the UK that are structured as contractual trust agreements (CTAs). The transferred funds, which are managed in trust and used only for a specific purpose, are plan assets within the meaning of IAS 19 which are offset against pension obligations.

The German companies' plan assets are primarily managed by TÜV SÜD Pension Trust e. V. and TÜV Hessen Trust e. V. and are irrevocably protected from recourse by the group companies. The plan assets are invested by professional investment managers in accordance with the policy specified by trustees. The objective is for the strategic allocation to be aligned with the pension obligation. This is monitored on a regular basis by performing asset liability management (ALM) studies in consultation with external experts.

As of December 31, 2020, the plan assets comprise shares, fixed-interest securities, real estate, alternative investments, derivatives, cash and cash equivalents and other assets.

TÜV SÜD Pension Trust e.V. is funded such that the pension payments reimbursed by TÜV SÜD Pension Trust e.V. are contributed back into the CTA by the relevant domestic companies and additional funds are made available by the Board of Management of TÜV SÜD AG as part of a new allocation. The actual contribution is determined each year by resolution of the Board of Management.

In the case of domestic group companies that are not part of the contractual trust agreements, the pension obligations are funded from generated cash flows.

107 Consolidated statement of cash flows

To fully fund the obligations, in the UK there is a companybased pension plan according to which the fund assets can only be used to settle the pension obligations. If, calculated in accordance with actuarial principles, there is a deficit in these pension plans, the member employer TÜV SÜD (UK) Ltd., Fareham, Hampshire, UK, and the trustee must agree on a financing plan that is renewed every three years and has to be presented to The Pension Regulator (TPR) for approval. To finance the deficit of around GBP 12.9 million determined at the end of 2016, the member employer agreed to make an annual contribution of GBP 2.2 million until mid-2021 in addition to the regular employer's contribution. The results of the next actuarial review are currently being finalized and will be subsequently passed on to the supervisory authorities. Because of the defined benefit plans, the TÜV SÜD Group is subject to duration risks, foreign currency risks, interest and credit spread risks, share price risks, liquidity risks, investment risks for infrastructure projects and property market risks.

In the fiscal year 2021, the Group intends to make a contribution to plan assets of \notin 74.1 million in order to further reduce the existing deficit (the planned figure for 2020 was \notin 79.2 million, the end-of-year figure, including one-off additions of \notin 42.6 million, amounted to \notin 119.1 million).

The funded status of defined benefit obligations as well as a reconciliation to the amounts recognized in the statement of financial position are shown in the table below:

	Germany		Other countries		Total

Currency translation differences and other	0.0	-6.3	-6.3	-0.9	5.4	4.5	
Defined benefit obligation as of December 31	2,172.9	135.3	2,308.2	2,128.2	128.1	2,256.3	
thereof unfunded	287.8	10.0	297.8	287.0	10.0	297.0	
thereof partially funded	1,885.1	125.3	2,010.4	1,841.2	118.1	1,959.3	

Around 57% (prior year: 57%) of the defined benefit obligation is allocable to pensioners, and 43% (prior year: 43%) to active employees and vested beneficiaries. The weighted average duration of the obligations is 15.2 years (prior year: 15.2 years).

The main factor influencing the development of the defined benefit obligation is the underlying discount rate, which in Germany fell by a further 30 base points from 0.95% to 0.65% in a year-on-year comparison and resulted in actuarial losses from financial assumptions of \notin 76.5 million (prior year:

€ 226.9 million). In the UK, the development of the capital markets also made it necessary to once again reduce the discount rate by 70 base points, with resulting actuarial losses of € 10.9 million (prior year: € 13.0 million). In the prior year, gains from the change in demographic assumptions from raising the retirement age in Germany from 63 to 65 had the opposite effect.

Pension payments of \in 83.3 million are expected for the fiscal year 2021.

Plan assets

Composition of plan assets		≡ 55
IN & MILLION	Dec. 31, 2020	Dec. 31, 2019
Shares (prior to hedging)	431.7	447.5
Fixed-interest securities	626.3	556.5
Share in investment company for infrastructure projects and private debt funds	292.5	238.6
Real estate and similar assets – used by third parties, vacant or under construction	336.1	308.0
Other (including cash and cash equivalents)	135.6	156.9
	1,822.2	1,707.5

All shares and fixed-interest securities are traded at the prices quoted on active markets.

The investment strategy for the plan assets is geared to covering the deficit between plan assets and pension obligations on a long-term basis. This is based on the increase in the obligations adjusted for current service cost and pension payments. The investment strategy also includes a controlled downside risk (low probability of a sharp fall in the coverage ratio) and is determined at regular intervals in ALM studies. The resulting target allocation includes an optimized risk return profile, taking into account the interdependency of plan assets and obligations.

The risks for plan assets stem chiefly from the investments in the Oktagon fund. Among others, these include interest and credit spread risks which, however, run counter to changes in the pension obligations. Further risks stem from fluctuations in share prices. Interest and share price risks can be hedged as needed by means of publicly traded futures in a dedicated control segment. Most of the foreign currency risks relating to investments in fixed-interest securities are hedged in full. The investment in Alters- und Hinterbliebenen-Versicherung der Technischen Überwachungs-Vereine -VvaG- ["AHV", an old-age and surviving dependents pensions fund for technical inspection associations] also entails interest, credit spread and share price risks. In the case of infrastructure investments, risks include illiquidity and regulatory intervention by individual countries. Investments in real estate involve technical risks (maintenance) and economic risks (rental price changes for new lets, level of occupancy).

Risk management takes a holistic approach, taking into account the development of plan assets and pension obligations. The main risk relates to a deterioration in the funded status (coverage shortfall) on account of negative developments of the pension obligations and/or plan assets. Risk management is based on the risk budget for pension risks, which breaks down into a budget for non-controllable risks (e.g., the portion of pension obligations not covered by plan assets) and for controllable risks. The controllable risks relate first and foremost to the risks in the CTA. The risk budget requirement and exploitation are determined using value-at-risk methods and monitored periodically.

As part of the implementation of the most recent ALM study 2020, various reallocations were made to achieve a new target allocation.

Defined benefit obligation

Actuarial assumptions for determining the defined benefit obligation

	Dec. 31, 2020		Dec. 31, 2019	
IN %	Germany	Other countries	Germany	Other countries
Discount rate	0.65	1.22	0.95	1.85
Future salary increases	2.25	2.00	2.25	2.02
Future pension increases	1.80	2.75	1.80	2.95

The actuarial assumptions have been continuously derived in accordance with uniform principles compared to the prior year and set out for each country depending on the respective economic circumstances.

The discount rate in Germany is calculated in accordance with the RATE:Link model developed by the Group's actuary Willis Towers Watson Deutschland GmbH, Wiesbaden, to determine the discount rate for the measurement of pension obligations. On account of changes at Bloomberg, in the future not the Bloomberg Industry Classification System (BICS) but rather the BCLASS system will be used as the basis for determining the portfolio of high-value corporate bonds that is decisive for fixing the interest rate in the RATE:Link model of Willis Towers Watson. The thus refined bond selection procedure constitutes a change in accounting estimate pursuant to IAS 8. As of December 31, 2020, this led to an increase in the discount rate by 31 base points and a decrease in the projected benefit obligation of \notin 105 million compared to the previous method used to determine the discount rate.

Adjustment for forecast long-term inflation is taken into account in the development of future salary and pension increase. The respective inflation rate does not exceed the interest rate observable on the market.

Sensitivity analyses

As far as life expectancy is concerned, the mortality tables 2018 G from HEUBECK-RICHTTAFELN-GmbH have been applied unchanged in Germany since 2018. Outside Germany, the customary mortality tables for the respective country were used.

A change in the aforementioned assumptions used to determine the defined benefit obligation in Germany as of December 31, 2020 would lead to a corresponding change in this figure. An analysis of historical changes in parameters from this perspective showed that if there was a change in the discount rate of up to 100 base points, a change of up to 75 base points for the development of future salary and pension increase as well as an increase of up to 5.3% for life expectancy up to the next measurement date can be regarded as realistic. The change in the underlying assumptions regarding life expectancy translates into a one-year increase in life expectancy for a currently 65-year-old man. The respective effects from such a change in measurement are presented on the assumption that all other parameters remain constant.

	DBO Germany as of December 31, 2020		DBO Germany as of December 31, 2019	
IN € MILLION	Increase	Decrease	Increase	Decrease

Net pension expense

The assumptions made to calculate the defined benefit obligation as of the respective measurement date (December 31) apply to both the calculation of the interest cost and the current service cost as well as to the interest income on plan assets in the following fiscal year. The assumptions used to calculate the pension expenses for the fiscal year 2020 were therefore already defined as of the reporting date December 31, 2019.

The key assumptions in calculating pension expenses are presented in the following overview:

Actuarial assumptions for determining pension expenses

	2020		2019	
IN %	Germany	Other countries	Germany	Other countries
Discount rate	0.95	1.85	1.70	2.62
Future salary increases	2.25	2.02	2.25	2.06
Future pension increases	1.80	2.95	1.80	3.10

The expense recognized for defined benefit pension plans in total comprehensive income for the fiscal years 2020 and 2019 breaks down as follows:

Personnel provisions mainly pertain to variable remuneration for staff and management including associated social security contributions, obligations arising from the agreements under the German phased retirement scheme, medical benefits and long-service bonuses.

Overall, obligations are counterbalanced by reimbursement claims from insurance companies amounting to € 5.3 million (prior year: € 4.9 million), which were recognized as current assets.

Provisions for litigation costs, damages and similar obligations largely include the provisions for liability risks and advisory expenses in connection with the dam collapse in Brazil, which are counterbalanced by contingent assets from insurance benefits in the single-digit million euro range. Please refer to the comments in note 30 "Pending and imminent legal proceedings".

The restructuring provisions primarily relate to adopted and announced restructuring measures in the INDUSTRY Segment.

Contract liabilities	121.2	96.5
Other trade payables	79.3	84.8
	200.5	181.3

Contract liabilities contain advance payments received of € 46.7 million (prior year: € 33.8 million). Of these liabilities, € 59.5 million (prior year: € 51.9 million) will be billed within one year. The amount of contract liabilities contained in liabilities as of December 31, 2019, of € 91.3 million (prior year: € 77.9 million) was recognized as revenue in fiscal year 2020.

27 / LEASES

As a lessee, TÜV SÜD rents real estate, mainly test centers, testing facilities and office buildings. The lease conditions of these agreements are negotiated on an individual basis and contain a range of differing conditions. These primarily include options to extend and terminate leases. These kinds of contractual arrangements are used to provide TÜV SÜD with the greatest possible flexibility in respect of the contract portfolio. Just over 15% of the real estate agreements have originally agreed terms of fifteen years and over. In respect of lease payments, several lease agreements provide for additional rent payments based on changes to local price indices.

Lease agreements for other equipment largely relate to leases for vehicles, which have been concluded over a fixed term of three to five years.

The Group rents IT equipment with contractual terms of three and four years. These lease agreements are based on low-value assets. As the Group applies the exemption under IFRS 16, neither a right-of-use asset nor a lease liability is recognized for these agreements.

The following tables show the carrying amounts of the right-ofuse assets and the changes during the reporting period:

Right-of-use assets 2020

IN & MILLION	Land and buildings	Technical equipment and machinery	Other equipment, furniture and fixtures	Total
Additions 2020	180.9	0.2	13.0	194.1
Depreciation and impairment losses 2020	55.6	0.2	13.7	69.5
Carrying amounts as of December 31, 2020	351.1	0.4	24.3	375.8

Right-of-use assets 2019

IN & MILLION	Land and buildings	Technical equipment and machinery	Other equipment, furniture and fixtures	Total
Additions 2019	44.3	0.0	16.4	60.7
Depreciation and impairment losses 2019	49.6	0.6	13.9	64.1
Carrying amounts as of December 31, 2019	235.2	0.4	25.5	261.1

≡ 66

As of the reporting date, the right-of-use assets are counterbalanced by the following lease liabilities:

Maturity profile of lease liabilities based on undiscounted lease payments

IN € MILLION	2020	2019
Lease payments due within one year	64.4	60.3
Lease payments due in one to five years	158.6	138.4
Lease payments due in more than five years	275.7	88.6
Total undiscounted lease liabilities as of December 31	498.7	287.3
Lease liabilities in the statement of financial position as of December 31	382.9	263.8
thereof current	56.2	55.2
thereof non-current	326.7	208.6

Possible future cash outflows of \notin 19.1 million (prior year: \notin 17.8 million) were not included in the lease liability as it is not reasonably certain that the agreements will be extended. Leases into which the Group has entered into as a lessee, but which have not yet commenced, result in possible future cash outflows of \notin 24.3 million (prior year: \notin 13.6 million).

In 2020, payments for leases recognized pursuant to IFRS 16 amounted to \notin 72.2 million (prior year: \notin 66.1 million). The non-cash increases of lease liabilities (additions, interest, disposals, currency translation) amount to \notin 191.3 million (prior year: \notin 60.2 million).

The expenses recognized in the income statement for leases accounted for pursuant to IFRS 16 totaled \in 77.8 million in fiscal year 2020 (prior year: \in 70.4 million). Furthermore, expenses for short-term leases of \in 4.5 million (prior year: \in 5.8 million) and expenses for leases of low-value assets of \in 1.8 million (prior year: \in 2.1 million) were incurred. Both of these were recognized under other expenses.

≡65

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

28 / CONTINGENT ASSETS AND LIABILITIES

There are contingent assets from insurance benefits for expenses in 2020 in the single-digit million euro range. The contingent assets for expenses in 2019 disclosed in a similar amount in the prior year were collected and recognized with effect on income in the reporting year.

The table below presents the contingent liabilities for which the main debtor is not a consolidated entity:

Contingent liabilities		≡67
IN € MILLION	Dec. 31, 2020	Dec. 31, 2019
Guarantee obligations	46.5	56.1
Contingent liabilities arising from litigation risks	1.5	1.7
Miscellaneous contingent liabilities	1.8	2.0
	49.8	59.8

The guarantee obligations include a guarantee issued for T.P.S. Benefits Scheme Limited, Fareham, UK. The guarantee reduces the insurance fees charged by the Pension Protection Fund, Surrey, UK, which the UK companies participating in T.P.S. Benefits Scheme Limited, Fareham, UK, would otherwise have to pay on an annual basis.

The obligations were entered into for current business transactions where no utilization is to be expected based on the assessment of the current business situation.

There are guarantee obligations for joint ventures in the amount of ${\bf \in 2.5}$ million.

Apart from the contingent liabilities reported, the entities of TÜV SÜD Group have assumed joint and several liability in relation to interests in civil law associations, other partnerships and joint ventures.

Please refer to note 30 in respect of the disclosure on the contingent liabilities in association with pending and imminent legal proceedings.

29 / OTHER FINANCIAL OBLIGATIONS

There are other financial obligations in the amount of \notin 17.2 million (prior year: \notin 18.5 million) and these largely relate to service and maintenance agreements.

30 / PENDING AND IMMINENT LEGAL PROCEEDINGS

On January 25, 2019, the tailings dam of a retention basin for an iron ore mine belonging to mining company Vale S.A. close to the village of Brumadinho, Brazil, collapsed. The dam's stability had been certified by TÜV SÜD BRASIL in September 2018. After the accident, Vale S.A., who as the operator of the dam is responsible for operational safety, referred to external appraisals, including that issued by TÜV SÜD BRASIL on the safety of the dam.

Lawsuits claiming damages have been filed in connection with the certificate of stability issued in 2018. There are also potential penalties for administrative offences. TÜV SÜD believes that it is probable that further lawsuits will be filed against TÜV SÜD, in particular as the possible bases for these claims do not require there to be any culpability, rather only causality. Probability-weighted scenarios have been rolled forward from the prior year on the basis of the information available at present in order to realistically estimate the exposure. However, as the aforementioned investigations and TÜV SÜD's internal investigations are still ongoing and the factors of influence to be considered in a legal dispute are multi-faceted, the actual exposure and the expected duration of the proceedings may deviate from these estimates.

The provisions recognized in the prior year for legal defense and advisory costs of \in 28.5 million decreased to \in 20.0 million as of the reporting date. The utilization in 2020 for the costs of engaging external third parties to clarify the facts of the matter and defend TÜV SÜD's legal position was counterbalanced by an addition based on the lawsuits that have been filed to date. From these it is expected that the proceedings will go on for longer and be more complex than was assumed in the prior year. Part of the legal defense costs are covered by an insurance policy. As these claims are currently not virtually certain in terms of their amount, they have not been recognized as an asset. However, since they are more probable than not, a contingent asset in the single-digit million euro range has been assumed.

CONSOLIDATED FINANCIAL STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

For further liability risks, in particular personal injury, the management of TÜV SÜD estimates the likelihood of a utilization as possible; a contingent liability is therefore in place for this.

Other disclosures on the estimates in respect of the financial implications and disclosures on uncertainty regarding the amount or maturity of amounts of the provisions and contingent liabilities have not been made in this regard pursuant to IAS 37.92 so as not to compromise the findings of potential proceedings and the Group's interests.

Should the outcome of the legal proceedings find to the detriment of TÜV SÜD, this may result in substantial damage payments and other payments that could have a significant negative impact upon the Group's financial performance and position and its reputation. The ability of the Brazilian subsidiary TÜV SÜD BRASIL and its direct shareholder TÜV SÜD SFDK Laboratório de Análise de Produtos EIRELI, São Paulo, Brazil, to continue as a going concern is jeopardized should these companies be held liable for the dam collapse in Brazil and no further financial support were to be provided by the shareholders. For further explanations please refer to the sections "Compliance and other risks" and "Overall statement on risks faced by the Group" in the combined management report.

Apart from this, TÜV SÜD AG and its subsidiaries are not involved in any litigation which could have a material impact on the economic or financial situation of the individual entities or the Group as a whole.

CONSOLIDATED FINANCIAL STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

There were no reclassifications to or from another level of the fair value hierarchy in the current fiscal year.

The financial instruments allocated to level 2 are derivatives and securities. A purchase price liability from a put option falls under level 3.

The calculation of the fair values of forward exchange transactions and currency swaps is based on FX forward swap market data used to interpolate the current forward points (FX forward swaps) on a straight-line basis from the information available from Refinitiv and add them to the spot rate. This makes it possible to calculate the current price at which the hedge can be closed out. The fair value of interest derivatives is calculated using discounted cash flow methods. To this end, the total value of an interest derivative is broken down into its individual cash flows, each of which is measured individually. Forward interest rates and valuations are recognized at the mean of the buying and the selling rate. The interpolation and any simulations are based on nominal interest, which is used to determine the zero interest rates in order to derive the discount factors. For interest derivatives in foreign currency, the present value is translated to euro at the mean of the buying and the selling rate.

The table below shows the development of the financial instruments recorded in level 3:

Reconciliation of financial instruments in level 3				≡71
	A:	ssets	Equity an	d liabilities
IN & MILLION	2020	2019	2020	2019
As of January 1	0.0	3.2	7.1	6.6
Currency translation differences	0.0	0.0	-1.0	-0.1
Changes recognized with an effect on income	0.0	-1.6	0.5	0.7
Changes with an effect on cash and cash equivalents	0.0	-1.6	-2.2	-0.1
As of December 31	0.0	0.0	4.4	7.1

The change to equity and liabilities with an effect on income was primarily attributable to unwinding the discount on an existing purchase price liability from a put option in South Africa. The change with an effect on cash relates to the exercise of a put option.

The net gains and losses on the financial instruments recognized in the income statement, by measurement category, are as follows: The net gains and losses are mainly attributable to effects from impairment losses, currency hedging and currency translation as well as measurement results from other derivatives.

Dividend income from other participations totals \notin 0.5 million (prior year: \notin 0.6 million).

32 / FINANCIAL RISKS

The TÜV SÜD Group faces financial risks in the form of credit risks, liquidity risks and market risks. The principles of risk management are defined by TÜV SÜD's internal finance policy as well as numerous binding strategies and guidelines and are discussed in more detail in the management report.

Credit risks (default risks) exist with regard to the operating business as well as to financial assets and derivative financial instruments. Depending on the nature and extent of the respective transaction, risk-mitigating measures must be taken for all transactions relating to the operating business. These include obtaining collateral, credit ratings or track records of prior business relations, particularly payment behavior. Recognizable risks are taken into account through appropriate valuation allowances on receivables that are based on objective indications in individual cases, or the maturity profile and actual default history.

The maximum credit risk for trade receivables, contract assets and loans is their carrying amount as of December 31, 2020.

The maximum credit risk of financial assets and derivative financial instruments corresponds to their fair value as of December 31, 2020.

The risk of default on securities is minimized by a high degree of diversity in the investment strategy. Only securities with an investment grade credit rating are purchased. The TÜV SÜD Group did not record any default on securities in the reporting year. Derivative financial instruments are only concluded with partners that have an investment grade rating and where a breach of contractual obligations is thus not expected.

CONSOLIDATED FINANCIAL STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

According to internal trading policies, derivative financial transactions may only be concluded in close consultation with the corporate finance department and in connection with an underlying transaction. To limit risks, subsidiaries in Germany and other countries are prohibited from purchasing securities without approval from the corporate finance department.

In order to manage liquidity risks, the TÜV SÜD Group always has up-to-date liquidity planning and sufficient liquidity reserves in the form of cash and credit lines. Bank balances are held solely at banks with excellent credit ratings. In addition, maximum investment limits are set for investment funds at various banks based on their credit rating in order to avoid cluster risks. Risks relating to current securities are also minimized by widely diversifying issuers. In addition to cash and securities, the liquidity reserve comprises a syndicated credit line for € 200 million. The syndicated credit line had an original term until December 2019 but was extended until December 2021 by exercising the corresponding option in 2018. In addition, further fixed agreed bilateral credit lines were concluded in 2020 with three core banks for a total of € 225 million. Without taking lease liabilities into account, as of the reporting date, payments due within one year of € 169.3 million (prior year: € 173.2 million) and payments due in more than one year of $\in 2.8$ million (prior year: € 2.5 million) are covered by cash and cash equivalents of € 294.6 million (prior year: € 203.9 million) as well as undrawn credit lines of € 435.8 million (prior year: € 212.9 million).

The main **market risks** resulting from financial instruments are currency and interest rate risks.

The scope for action with regard to currency management is defined by TÜV SÜD's internal policies. **Currency risks** in connection with the operating business are hedged using derivative financial instruments. Forward exchange transactions and cross-currency swaps are used to hedge intra-group loans in foreign currencies. With regard to trade receivables and payables, a 10% increase or decrease in the value of the euro against all other currencies as of December 31, 2020 would only have an immaterial effect on consolidated net income for the year. In the event of a 10% decrease in value of the euro, the market value of forward exchange transactions would fall by \notin 9.3 million (prior year: \notin 13.3 million). The market value of cross-currency swaps would increase by \notin 0.2 million (prior year: \notin 0.3 million) accordingly. In the event of a 10% increase in value of the euro against all other currencies, the market value of forward exchange transactions would rise by \notin 7.6 million (prior year: \notin 10.9 million). The market value of cross-currency swaps would decrease by \notin 0.1 million (prior year: \notin 0.2 million) accordingly.

Interest rate risks may arise for investments in fixed-interest securities. A 1% increase or decrease in interest rates would result only in insignificant changes in the market value. Financial debt may also be exposed to an interest rate risk. Derivative financial instruments are used on a case-by-case basis to hedge against this interest rate risk.

33 / NOTES TO THE STATEMENT OF CASH FLOWS

The cash and cash equivalents presented in the statement of cash flows contain all highly liquid items shown in the statement of financial position, i.e., cash in hand, checks and bank balances as well as current securities that are available within three months.

The contribution to pension plans consists of contributions equivalent to the pension payments made by the trustors to TÜV SÜD Pension Trust e.V. of \notin 66.5 million (prior year: \notin 61.7 million). Together with one-off additions with an effect on cash of \notin 30.0 million (prior year: \notin 30.0 million) to TÜV SÜD Pension Trust e.V. and \notin 0.0 million (prior year: \notin 20.5 million) to TÜV Hessen Trust e.V. as well as further additions to other plan assets of \notin 10.0 million (prior year: \notin 4.5 million), these payments are recognized as part of the cash flow from investing activities.

34 / SEGMENT REPORTING

Based on the organizational structure and existing reporting structures, TÜV SÜD has the three reportable segments INDUSTRY, MOBILITY and CERTIFICATION, as defined by the Board of Management. These cover technical services in the TIC (testing, inspection, certification) market. As the highest management level, the entire Board of Management regularly receives comprehensive information in order to assess the profitability of the segments described below and make decisions regarding the allocation of resources.

• **INDUSTRY** The Industry Service and Real Estate & Infrastructure Divisions support customers in operating industrial plants, infrastructure facilities, refineries, power plants and buildings safely and economically, as well as ensuring the functionality and safety of rail vehicles, signaling technology and rail infrastructures.

The INDUSTRY Segment collects revenue over time for services already rendered. These are invoiced pursuant to standard terms and conditions or individual contractual conditions. Any associated certification and license fees are invoiced annually, regardless of the services rendered, and collected over the term on a straight-line basis.

• MOBILITY This segment comprises all services for automobiles, which are offered by the Auto Service Division. These include services for homologation, used car valuations, management of vehicle fleets and product and process enhancement services for the automotive industry. For retail customers, roadworthiness tests and exhaust gas analyses, driver's license tests as well as driving suitability tests for road users and support with regaining and retaining their drivers' licenses in particular are offered.

In the MOBILITY Segment, revenue in the core business of roadworthiness tests and exhaust gas analyses as well as driver's license tests is recognized at a point in time; in the private customer business advance payments are regularly requested. In the fleet business, services rendered are invoiced monthly. All other services in this segment are invoiced pursuant to individual contractual conditions or standard terms and conditions. Revenue from these services is generally recognized over time. • **CERTIFICATION** The activities of the Product Service and Business Assurance Divisions are bundled in this segment. The Product Service Division offers services for the testing, inspection and certification of consumer goods as well as industrial and medical products. The Business Assurance Division comprises the three business units Management Systems, Academy and Cyber Security Services. All three business units support customers in optimizing their business processes, systems and resources.

In the CERTIFICATION Segment, revenue from services is collected over time. These are invoiced pursuant to standard terms and conditions or individual contractual conditions. Any associated certification and license fees are invoiced annually, regardless of the services rendered, and collected over the term on a straight-line basis.

Holding activities are reported under **OTHER**. OTHER also includes individual assets of subsidiaries that cannot be allocated to actual business operations of the operational segments.

TÜV SÜD operates in the following **geographic** segments:

- EUROPE comprises the home market of Germany as well as Western Europe and Central & Eastern Europe.
- AMERICAS covers both American continents, from Canada to the southern tip of South America.
- ASIA combines all the countries of the Asia-Pacific and South Asian area as well as the Middle East & Africa Region.

TÜV SÜD realizes revenue from service contracts with customers at a point in time and over time. External revenue is broken down by segment and region. Consolidations of business relationships between the segments are recorded in the reconciliation column.

35 / RELATED PARTIES

Related companies

The ultimate parent companies of the TÜV SÜD Group are TÜV SÜD e.V., Munich, and TÜV SÜD Stiftung, Munich (TÜV SÜD Foundation). Both TÜV SÜD e.V. and the TÜV SÜD Foundation have transferred their shares in TÜV SÜD AG to the independent shareholder committee, TÜV SÜD Gesellschafterausschuss GbR. Internally, TÜV SÜD e.V. and the TÜV SÜD Foundation hold 74.9% and 25.1% stakes in the assets of TÜV SÜD Gesellschafterausschuss GbR.

Within the framework of an agency contract, the activities under the accreditation to operate the road vehicle technical inspectorate are carried out by the group company TÜV SÜD Auto Service GmbH, Stuttgart, for TÜV SÜD e.V., as principal and recognized contractor. Business from the activities under the accreditation to operate the road vehicle technical inspectorate is conducted on behalf of, at the instruction of and in the name of TÜV SÜD e. V. All transactions and business processes are carried out in the TÜV SÜD Group. TÜV SÜD Auto Service GmbH maintains personnel and material on the scale necessary for the activities and operation. From the cost center accounting, the revenue allocable to TÜV SÜD e.V. is calculated and transferred. 98.5% of revenue from the business officially mandated is invoiced by the operating entity as a lump-sum payment for agency services. In fiscal year 2020, a total volume of € 104.6 million (prior year: € 108.1 million) was charged to TÜV SÜD e.V. From this source TÜV SÜD e.V. recorded revenue of € 106.2 million (prior year: € 109.8 million).

As of the reporting date, there are cash pool liabilities in the amount of $\notin 0.2$ million (prior year: cash pool receivables of $\notin 6.9$ million) to TÜV SÜD e.V. Effective December 31, 2019, TÜV SÜD AG acquired TÜV SÜD Pensionsgesellschaft mbH (formerly TÜV SÜD Föderation GmbH) from TÜV SÜD e.V. In the prior year, this transaction resulted in a purchase price liability of $\notin 7.1$ million to TÜV SÜD e.V., which was included in other financial liabilities as of December 31, 2019.

CONSOLIDATED FINANCIAL STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

In the fiscal years 2020 and 2019, the TÜV SÜD Group had business relationships with non-consolidated subsidiaries, associated companies and joint ventures that qualify as related parties. In the course of ordinary operations, all service transactions with these entities were carried out at arm's length conditions. In 2020, transactions were carried out with material related parties that led to the following items in the consolidated financial statements:

Items of the statement of financial position from transactions with non-consolidated subsidiaries, associated companies and joint ventures

	Non-consolidated subsidiaries		Associated companies		Joint ventures	
IN € MILLION	Dec. 31, 2020	Dec. 31, 2019	Dec. 31, 2020	Dec. 31, 2019	Dec. 31, 2020	Dec. 31, 2019
Loans	0.2	0.2	0.0	0.0	4.7	8.1
Receivables	1.1	1.3	0.0	0.0	9.5	1.5
Financial debt	0.0	0.3	0.0	0.0	0.0	0.0
Liabilities	3.8	4.7	0.0	0.0	0.6	0.8

Receivables from non-consolidated subsidiaries include valuation allowances amounting to \in 2.4 million (prior year: \in 2.4 million).

The business relationships with the Turkish joint ventures are based primarily on a license agreement between TÜVTÜRK Kuzey and TÜVTÜRK Güney (both licensors) and TÜV SÜD Bursa (licensee). In 2020, dividend distributions of the Turkish joint ventures amounted to \notin 9.6 million (prior year: \notin 12.7 million). Furthermore, in the prior year there was a distribution of \notin 0.1 million of the Spanish joint venture ITV Levante.

Dividend distributions of \in 0.8 million (prior year: \in 0.8 million) were received from associated companies.

TÜV SÜD AG issued letters of comfort for one related company and one joint venture. It is assumed that the companies can pay their current obligations themselves. Claims are therefore not expected.

In the prior year, TÜV SÜD ATISAE issued letters of comfort for two subsidiaries, ATISAE Trauxia ITV, S.L., Madrid, Spain, and Servicios Técnicos y Consultoria ITV, S.L., Madrid, Spain. These have since expired. A provision of \notin 0.2 million which had been recognized in the prior year for the expected utilization was released in 2020. Remuneration of active members of the Board of Management and Supervisory Board

The total remuneration of active members of the Board of Management amounted to \in 3.4 million in the fiscal year 2020 (prior year: \in 3.4 million). This includes variable, EVA-based salary components of \in 1.3 million in total (prior year: \in 1.3 million), which have not yet been paid out as of December 31. The additional service cost incurred for pension obligations amounted to \in 0.3 million (prior year: \in 0.3 million). The present value of the defined benefit obligation calculated in accordance with IFRSs amounted to \in 6.2 million as of the reporting date (prior year: \in 5.6 million).

The active members of the Supervisory Board received total remuneration of \notin 1.1 million in the fiscal year 2020 (prior year: \notin 1.2 million).

Remuneration of former members of the Board of Management and Supervisory Board

The total remuneration of former members of the Board of Management and their surviving dependents including pension payments and other payments (advisory services) amounted to \notin 1.3 million (prior year: \notin 1.3 million). Defined benefit obligations amounting to \notin 18.6 million (prior year: \notin 18.6 million) exist for former members of the Board of Management and their surviving dependents.

36 / PROPOSAL FOR THE APPROPRIATION OF PROFIT

The Board of Management and Supervisory Board will propose to the annual general meeting to distribute $\notin 2.1$ million from the retained earnings under German GAAP of TÜV SÜD AG totaling $\notin 349.1$ million, equivalent to $\notin 0.08$ per share. The remaining amount of $\notin 347.0$ million is to be carried forward to new account.

38 / EVENTS AFTER THE REPORTING DATE

At the beginning of 2021, TÜV SÜD Pensionsgesellschaft mbH, Munich, was included as a further trustor in the CTA and transferred cash pool receivables of \in 58.0 million to TÜV SÜD Pension Trust e. V., Munich. In addition, TÜV SÜD Industrie Service GmbH, Munich, and TÜV SÜD Auto Service GmbH, Stuttgart, each contributed a further \in 50.0 million in cash pool receivables to the CTA. TÜV SÜD AG gave its consent for all three transactions and also contributed corresponding cash pool liabilities to the CTA. The covering assets of TÜV SÜD AG were reduced accordingly by \notin 158.0 million.

The sale of the equipment business in the USA, which was disclosed as a disposal group held for sale at the end of 2020, was closed on February 19, 2021.

1O8 Consolidated statement of changes in equity 110 Notes to the consolidated financial statements

159 Independent auditor's report

INDEPENDENT AUDITOR'S REPORT

To TÜV SÜD AG, Munich

Report on the Audit of the Consolidated Financial Statements and of the Combined Management Report

Opinions

We have audited the consolidated financial statements of TÜV SÜD AG, Munich, and its subsidiaries (the Group), which comprise the consolidated statement of financial position as of December 31, 2020, and the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the financial year from January 1 to December 31, 2020, as well as notes to the consolidated financial statements, including a summary of significant accounting policies. In addition, we have audited the combined management report (hereinafter referred to as "group management report") of the TÜV SÜD Group and TÜV SÜD AG for the financial year from January 1 to December 31, 2020. In accordance with German legal requirements, we have not audited the content of the components of the group management report described in the "Other information" section of our auditor's report.

In our opinion, on the basis of the knowledge obtained in the audit,

- the accompanying consolidated financial statements comply, in all material respects, with the IFRSs as adopted by the EU, and the additional requirements of German commercial law pursuant to Section 315e (1) HGB [Handelsgesetzbuch: German Commercial Code] and, in compliance with these requirements, give a true and fair view of the assets, liabilities, and financial position of the Group as of December 31, 2020, and of its financial performance for the financial year from January 1 to December 31, 2020, and
- the accompanying group management report as a whole provides an appropriate view of the Group's position. In all material respects, this group management report is consistent with the consolidated financial statements, complies with German legal requirements and appropriately

presents the opportunities and risks of future development. Our opinion on the group management report does not extend to the content of the above-mentioned components of the group management report described in the "Other information" section.

Pursuant to Section 322 (3) sentence 1 HGB, we declare that our audit has not led to any reservations relating to the legal compliance of the consolidated financial statements and of the group management report.

Basis for the Opinions

We conducted our audit of the consolidated financial statements and of the group management report in accordance with Section 317 HGB and the German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) [Institute of Public Auditors in Germany]. Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and of the Group Management Report" section of our auditor's report. We are independent of the group entities in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinions on the consolidated financial statements and on the group management report.

Information on an Issue of Particular Concern -**Dam Collapse in Brazil**

Please see management's comments in note 5 sub-item "Assumptions, estimation uncertainties and judgments" in conjunction with note 30 of the notes to the consolidated financial statements and in the sections "Business development" and "Compliance and other risks" in the group management report, which describe the effects of a dam collapse in Brazil in January 2019 - the stability of the dam had been certified by a subsidiary of TÜV SÜD AG in summer 2018 - and the provisions determined for this matter. Management notes considerable estimation uncertainty regarding assumptions on the probability of occurrence, the time of payment and the amount of the risk, with the result that the outcome of the pending and imminent legal proceedings could have a significant STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

influence on the Group's assets, liabilities, financial position and financial performance for financial year 2021 and future financial years. Our audit opinions on the consolidated financial statements and group management report have not been modified in this regard.

Material Uncertainty about Two Subsidiaries' Ability to Continue as a Going Concern

Please see the disclosures in note 30 of the notes to the consolidated financial statements and the information in the sections "Compliance and other risks" and "Overall evaluation of the Group's risk situation" in the group management report for information on potential claims against TÜV SÜD concerning the dam collapse in Brazil. In those sections, management explains that the continuation as a going concern of the Brazilian subsidiary TÜV SÜD Brasil Engenharia e Consultoria Ltda., São Paulo, Brazil, and its direct shareholder TÜV SÜD SFDK Laboratório de Análise de Produtos EIRELI, São Paulo, Brazil, is at risk if these companies are held liable for the damages resulting from the dam collapse in Brazil and if no further financial support is provided by the shareholders. These events and circumstances indicate considerable uncertainty that could cast significant doubt on the two companies' ability to continue their business activities and which represent a risk that could affect the respective company's ability to continue as a going concern within the meaning of Section 322 (2) sentence 3 HGB. Our opinions have not been modified with respect to this matter.

Other Information

Management and the Supervisory Board are responsible for the other information. The other information comprises the following parts of the group management report, the content of which has not been audited:

- the corporate governance statement (information on female representation pursuant to Section 289f (4) HGB of TÜV SÜD AG), which is contained in the corporate governance report section of the group management report, and
- the disclosures in the group management report not typical of management reports and marked as unaudited.

The other information also comprises the remaining components of the annual report.

The other information does not comprise the consolidated financial statements, the disclosures in the group management report included in our audit and our related auditor's report. Our opinions on the consolidated financial statements and on the group management report do not cover the other information, and consequently we do not express an opinion or any other form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information and, in so doing, to consider whether the other information

- is materially inconsistent with the consolidated financial statements, with the disclosures in the group management report included in our audit or our knowledge obtained in the audit, or
- otherwise appears to be materially misstated.

Responsibilities of Management and the Supervisory Board for the Consolidated Financial Statements and the Group Management Report

Management is responsible for the preparation of the consolidated financial statements that comply, in all material respects, with IFRSs as adopted by the EU and the additional requirements of German commercial law pursuant to Section 315e (1) HGB and that the consolidated financial statements, in compliance with these requirements, give a true and fair view of the assets, liabilities, financial position, and financial performance of the Group. In addition, management is responsible for such internal control as they have determined necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting unless there is an intention to liquidate the Group or to cease operations, or there is no realistic alternative but to do so.

CONSOLIDATED FINANCIAL STATEMENTS

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

Furthermore, management is responsible for the preparation of the group management report that, as a whole, provides an appropriate view of the Group's position and is, in all material respects, consistent with the consolidated financial statements, complies with German legal requirements, and appropriately presents the opportunities and risks of future development. In addition, management is responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a group management report that is in accordance with the applicable German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the group management report.

The Supervisory Board is responsible for overseeing the Group's financial reporting process for the preparation of the consolidated financial statements and of the group management report.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements and of the Group Management Report

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the group management report as a whole provides an appropriate view of the Group's position and, in all material respects, is consistent with the consolidated financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our opinions on the consolidated financial statements and on the group management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Section 317 HGB and in compliance with the German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and this group management report. We exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the consolidated financial statements and of the group management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- obtain an understanding of internal control relevant to the audit of the consolidated financial statements and of arrangements and measures (systems) relevant to the audit of the group management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of these systems.
- evaluate the appropriateness of accounting policies used by management and the reasonableness of estimates made by management and related disclosures.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the consolidated financial statements and in the group management report or, if such disclosures are inadequate, to modify our respective opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to be able to continue as a going concern.

104 Consolidated income statement
105 Consolidated statement of comprehensive income
106 Consolidated statement of financial position
107 Consolidated statement of cash flows

108 Consolidated statement of changes in equity
110 Notes to the consolidated financial statements
159 Independent auditor's report

- evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements present the underlying transactions and events in a manner that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Group in compliance with IFRSs as adopted by the EU and the additional requirements of German commercial law pursuant to Section 315e (1) HGB.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express opinions on the consolidated financial statements and on the group management report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our opinions.
- evaluate the consistency of the group management report with the consolidated financial statements, its conformity with [German] law, and the view of the Group's position it provides.
- perform audit procedures on the prospective information presented by management in the group management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by management as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do not express a separate opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

lfW	"Institut für Weltwirtschaft" (Engl.: Institute for the World Economy)
IMF	International Monetary Fund
ImmoWertV	"Immobilienwertermittlungsverordnung" (Engl.: German Ordinance on the Valuation of Property)
Incremental borrowing rate of the lessee	The rate of interest that a lessee would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment
Industry 4.0	Connecting industrial production with modern information and communication technology. The technical foundation is digitally connected smart systems. People, machines, installations, logistics and products communicate and cooperate with each other directly. Optimization of the entire value chain.
Interest rate swap	Interest derivative where two counterparties agree to exchange interest payments at fixed nominal amounts at a specific point in the future
ISO	International Organization for Standardization
IT	Information technology
IVDR	In-vitro Diagnostic Regulation
MDD	Medical Devices Directive
MDR	Medical Devices Regulation
MHRA	Medicines and Healthcare products Regulatory Agency

MSSP	Managed Security Service Provider
NOPAT	Net operating profit after taxes
Notified Body/NoBo	Notified body Neutral and independent private organization designated by the state to assess conformity (auditing/certifying body)
PPA	Purchase Price Allocation
PSVaG	"Pensions-Sicherungs-Verein" (Engl.: German Pension Protection Scheme)
Secure cloud	Patented security technology that uses purely technical means to ensure that data is encrypted during transfer and storage and also that data and connection information is protected during processing. Operators and administrators have no technical access to the data.
SEI	Sound emission inspection
Smart glasses	Glasses that transfer images, which add information to the user's field of vision
Smart Industry Readiness Index (SIRI)	Diagnostic tool to assess the current condition of plant and equipment and to obtain a better understanding of Industry 4.0 concepts in terms of processes, technology and organization
Supply Chain Management	Establishing and managing integrated logistic chains (flow of material and information) over the entire value- added process
TIC	Testing, Inspection, Certification
TISAX	Trusted Information Security Assessment Exchange
TPR	The Pension Regulator
	British regulatory agency for pensions
UNECE	United Nations Economic Commission for Europe
VPN	Virtual Private Network
VVaG	"Versicherungsverein auf Gegenseitigkeit" (Engl.: German mutual insurance association)
WACC	Weighted Average Cost of Capital
ZLG	"Zentralstelle der Länder für Gesundheitsschutz bei Arzneimitteln und Medizinprodukten" (Engl.: Central Authority of the Länder for Health Protection with regard to Medicinal Products and Medical Devices)

NOTES AND FORWARD-LOOKING STATEMENTS

In this annual report, TÜV SÜD makes statements relating to the future development of business and future financial and non-financial performance indicators. These statements can be recognized by wording such as "expect", "intend", "anticipate", "plan" and similar terms. These statements are based on current expectations and certain assumptions on the part of the company management, many of which are beyond the control of TÜV SÜD. They are subject to a large number of risks, uncertainties and factors, including but not limited to those described in the annual report. If one or more of these risks or uncertainties should occur, or if it should prove to be the case that the underlying expectations do not materialize or that assumptions were incorrect, the actual results, performance or achievements of TÜV SÜD can deviate significantly from the information explicitly or implicitly referred to in the outlook. Due to rounding, it is possible that individual figures in this annual report do not add up to exactly the given total, and that percentages presented do not reflect exactly the absolute figures to which they refer.

In the event of differences between the English translation and the German version of this annual report, the German version is authoritative and has precedence over the English.

For technical reasons, there may be differences between the accounting documents in this annual report and those published due to statutory requirements.
